

# SAFETY CULTURE

Change our HABIT based on lessons learned from previous incidents within company/industry.

Break the DOMINO to prevent the incidents (88% accidents are due to unsafe acts).

No work to be done without the PERMITS.

Do a proper RISK ASSESSMENT by going through the hazard register.

Stay CONSCIOUS while working onboard, if not take sufficient rest periods.

No SHORCUT to safety (Let the job take few more minutes to complete)

Treat ourselves as the SAFETY MANAGER and lead by example.

Report unsafe act/conditions to the crew/their supervisor and STOP the work.

Apply BUDDY system wherever possible to prevent us doing mistakes.

Identify new HAZARDS and update hazard register to all crew.
